

Video Editor & Motion Graphic Designer

Summary: Do you happen to notice subtle details in TV ads? Do you find yourself thinking more about how a scene was shot rather than just watching the movie? Do you believe great imagery can truly change lives? If so, keep reading to see if you are the right person for this position.

Extensive experience with video editing software and motion graphics applications like Adobe After Effects & Adobe Premiere as well as other skills like color grading and audio recording for video is a requirement for this job. Please be prepared to submit samples of recent work!
